

## CAM Engraving Fonts

These fonts are high-quality single line fonts that have been developed especially for the fast engraving process. As these fonts are not filled, they are processed very quickly.

The fonts are available in TrueType, Type-1 and OpenType format for the platforms Windows, Apple, and Unix. The fonts don't need any tool radius correction, reducing the calculation time as well as processing time.

All fonts are delivered as a plain 1-Line plus a 2-Line variant. The CD provides the font formats TrueType (.TTF also with Western1252 Encoding), Type-1 (.pfa, .font, .nfont, .pfb), and OpenType (.otf).

The fonts are either available as a complete package or separately.

The ant

The ant has made herself illustrious  
By constant industry industrious.  
So what? Would you be calm and placid  
If you were full of formic acid?

(Ogden Nash)
